

Personal ID

Personal ID card

Delivery set includes an owner personal ID card containing following data:

- Login and password for StarLine personal account at starline.online or StarLine app
- Emergency disarm code for instant security deactivation when regular disarming methods unavailable
- Service code to enter main unit configuration parameters in StarLine Master software
- Main unit serial number

Login	Emergency disarm code
<input type="text"/>	<input type="text"/>
Password	Service code
<input type="text"/>	<input type="text"/>
Login and password for access to starline.online private account, if GSM module available	<input type="text"/>
<input type="text"/>	

Remove protection layer from plastic card carefully. Do not use metal and other sharp items to avoid occasional erasing a printed information under layer.

Do not tell emergency disarm code and StarLine account details to anybody!

Due to security reasons a personal information from ID card is generated randomly at factory, never stored in any database and therefore cannot be recovered once it is lost! A system main unit with lost Service code and Emergency disarm code cannot be normally used and must be replaced to a new one. Recommend to copy and store ID card information

in a safe place in reach.
